

MANI VARMA BEKKAM

+1 4094447873 | mbekkam5@gmail.com | [LinkedIn](#) | Houston, Tx

SUMMARY

Around 3+ years of experience as a Full Stack Developer in Software Analysis, Design, Development, Implementation, and Testing of Object-Oriented web Applications and AI features. Proficient in UI design with expertise in JSP, HTML5, CSS3, JavaScript, Ajax, jQuery, Angular, Node JS, and React JS. Well-versed in Agile/Scrum methodologies. Experienced in developing distributed, secure, and scalable applications using J2EE Technologies such as Servlets, JDBC, JSP, Struts, Spring Boot, Spring MVC, AWS, and Web Services (SOAP and RESTful). Knowledgeable in working with relational databases and ORM frameworks like PostgreSQL, MySQL, Oracle, and NoSQL DB. Familiar with build tools like Ant, Maven, and Gradle for application deployment

TECHNICAL SKILLS

Languages: JavaScript, C, Java, Python, HTML5, CSS, Typescript

Frameworks: React, Angular, Node.js, Bootstrap, jQuery, Jest, Spring boot, Flask, Streamlit

Tools & Libraries: CI/CD pipelines, VS Code, GIT, Docker, Kubernetes, REST APIs, Unit testing, Agile, Data Structures, PostMan, AWS, GCP, Jenkins, Jupyter, PyTorch, Gulp, Webpack, SASS, SCSS, Redux, Figma, Material UI, GraphQL, Sagemaker, Lambda.

AI/ML: Tensorflow, Matplotlib, SciPy, NLP, OpenCV, Semantic Search(BERT), Transformers, ML algorithms.

EDUCATION

Lamar University, Beaumont, Tx

Jan 2023-Dec 2024

Master of science in computer science

Grade 3.84

EXPERIENCE

SAMSUNG(HARMAN), Full Stack Developer | BANGLORE, INDIA

March 2022 - Jan 2023

- Developed webpages utilizing **React**, **HTML5**, **SCSS**, and **Bootstrap**, to add features for the internal tool "Digital cockpit".
- Developed and optimized backend services using RESTful APIs and microservices, reducing service response times by 20%.
- Integrated cloud-based systems (AWS, Microsoft Azure) into existing platforms, achieving 99.9% uptime and improving system reliability.
- Spearheaded the adoption of a containerized environment using Docker and Kubernetes, reducing deployment time by 60%.
- Collaborated with cross-functional teams of 10+ members to ensure seamless integration of frontend and backend functionalities.
- Implemented security best practices such as OAuth and JWT, reducing security vulnerabilities by 30%, took full ownership of creating a real-time service chat for providers using **Web Sockets**, enhancing communication around authorization requests and customer service inquiries.
- Led accessibility testing and unit testing with **Jest**, along with code reviews and production support.

FEBA Tech, Software Developer | Hyderabad, India

Feb 2020 – Feb 2022

- Developed and maintained a School Management System using React and TypeScript, enhancing user experience with a responsive and intuitive UI.
- state management using Redux Toolkit, ensuring efficient data flow and state consistency across the application.
- Utilized React hooks to manage side effects and state updates, improving component performance and reusability.
- Integrated theme configuration features, including light/dark mode, RTL support, and custom layout options, providing users with a personalized experience.
- Implemented user authentication and session management, ensuring secure access control and user data protection.
- Collaborated with cross-functional teams to design and develop new features, including student information management, class and section management, and attendance tracking.
- Optimized application performance and reduced load times by implementing code-splitting and lazy loading techniques, enhancing overall user satisfaction.

ACADEMIC PROJECTS

GEN_AI NEWS RESEARCH TOOL | Streamlit, VectorDB, FAISS, Python, OPENAI API, Langchain

- Developed and deployed a Streamlit-based web application, Gen_AI tool, for news research and information retrieval.
- Implemented data loading and processing using LangChain's UnstructuredURL Loader to fetch and process article content from URLs.
- Utilized OpenAI's embedding model and integrated FAISS for efficient and scalable similarity searches on embedding vectors.
- Designed and implemented a text splitting mechanism using RecursiveCharacterTextSplitter to handle large text data within token limits.

- Ensured seamless user experience by implementing a responsive and user-friendly interface with Streamlit's sidebar and input widgets.

MERN Stack Blogging Site | React, Express, Flowbite, Bcrypt, Javascript, MongoDB

- Developed a full-stack blog portfolio application using the MERN stack (MongoDB, Express, React, Node.js).
- Implemented user authentication and authorization with JWT and bcrypt for secure access.
- Designed a responsive and dynamic frontend with React and Tailwind CSS, ensuring a seamless user experience.
- Built RESTful API endpoints with Express and connected to a MongoDB database using Mongoose for efficient data management.

CERTIFICATIONS

AWS solutions Architect-Associate

Frontend (React) Certification from Hackerrank

Python Certification from Hackerrank
